

Rapid

- DC charging station

Fast charging station that is able to charge two electric vehicles at the same time using two CCS2 connectors. Charging station can be extended for one AC Plug Type 2 connector that provides slow charging for the third vehicle with the power up to 22 kW. Charging station is produced in versions: 60 kW, 120 kW, 150 kW and 180 kW. In case of charging two vehicles simultaneously through CCS2 connector, charging power is split.

Maximum DC charging power

60 kW / 120 kW / 150 kW / 180 kW

Input voltage

380V/400V/415V, 50 Hz AC

Working temperature

-20 to + 60 °C

Protection level

IP54

Output

1 x CHAdeMO , 1 x CCS Combo 2, 1 x Plug Type 2
(ak je súčasťou)
